Total management of tools simplifies inventory control!
Centralized inventory control reduces tooling cost!
Total management of tools simplifies inventory control!

**Issuing items**
- No product defect caused by using the wrong tools for the job
  - Only the right tools are accessible by the operator.
  - Proper operation prevents product recalls as well as waste of machining time and materials.
- All types of items managed by barcodes
  Barcode system delivers quick and accurate issue of items.

**Ordering items**
- Automatic ordering system based on reorder points
  Reorder points are calculated automatically.
- Purchase at the right time
  The ordering system prevents items from being out-of-stock and overstocked.

**Storing items**
- Quick and easy placement of a wide range of items
- Barcodes direct items to the correct bins
  Barcode system prevents items from being stored in the wrong place.
Excellent inventory management system

- **Secure access with ID devices**
  - All issuing/storing of items are limited to authorized personnel only.
  - Authorization methods:
    - Fingerprint scanning
    - Log-in password
    - Barcode reader
    - ID card (Magnetic card or RFID reader)

- **Usage history**
  Issuing/storing of items, change of item master file, and other actions taken on MATRIX are fully recorded in the database.

- **Remote control on a PC via LAN**
  All data is transferred through LAN and can be checked by operator and administrator in real time.

- **Total management for multiple MATRIX's located at different sites**
  Cabinets without a monitor can be connected together through the network.

Easy-to-use interactive touch panel

Screen of “Issue Item”
Photo/drawing of items can be attached.
Excellent statistical analysis system

- **Statistical data available for purchasing control and productivity analysis**

- **Identification of target for cost reduction**
  - Data of issued items gives the information from many different angles: By item, user, production line, workpiece material, etc.
  - Data also helps find dead stock and items that are hardly used.

**Reporting function**

All transactions of issuing/storing of items can be viewed in Excel, report, and graph formats, which drastically reduces workload in data management. Reports are scheduled to be emailed regularly.

---

Data provided by MATRIX:

- **Inventory**
  Quantity, unit price, total price

- **Usage log**
  History of issued/stored items, quantity of items used daily/monthly, average cost/consumption of each item for a certain period

- **Order history**
  Record for items ordered in the past

- **Order status**
  Items to be ordered/already ordered/received

- **Optimized stock level**
  Maximum/minimum stock level calculated automatically based on data of issued items

---

Screen to set up email delivery of reports

Example: Quantity of current inventory in a bar graph
Specifications: Cabinets

Product line-up in 2 sizes

MAXI: Tall cabinet with an enhanced storage capacity

- Maximum weight: Approx. 460 kg (depending on the number of drawers)
- Drawer heights: 50 mm, 75 mm, 100 mm
- Recommended load weight per drawer: 50 kg
- Electrical supply: 110AC ±10% 4.6A
- Body: Cabinet frame and drawers are strong against corrosion
- External colors: Black and silver

MINI: Compact cabinet for limited production space

- Maximum weight: Approx. 120 kg (depending on the number of drawers)
- Drawer heights: 50 mm, 75 mm, 100 mm
- Recommended load weight per drawer: 20 kg
- Electrical supply: 110AC ±10% 4.6A
- Body: Cabinet frame and drawers are strong against corrosion
- External colors: Black and silver

There is no minimum number of drawers required for both MAXI and MINI, so the user receives the exact storage capacity needed.

Caster wheels are available for MINI.
### Specifications: Bins and drawers

- Drawers available in 3 heights (inner size): 50 mm, 75 mm, 100 mm
- Some drawers come with bins in several sizes as below.
- The layout in each drawer can be changed by selecting different bins. The height of bins and the drawer must be the same. (Please note that the bin that has been attached to a drawer cannot be reinstalled in other drawers.)

#### Example: Inside of the drawer DX75-06

- **Pitch DxW**: (mm) (1x1) (1x2) (1x3) (1x4) (1x5) (2x1) (2x2) (2x3) (2x4) (2x6) (3x1) (3x3) (4x3)
- **H**: (mm) 50 39 39 142 50 39 92 242 75 66 242 100 39 445
- **D**: (mm) 50 39 39 92 75 39 92 142 75 39 92 100 39 142
- **W**: (mm) 50 39 39 92 75 39 92 142 75 39 92 100 39 142

- Drawers available in 3 heights (inner size): 50 mm, 75 mm, 100 mm
- Some drawers come with bins in several sizes as below.
- The layout in each drawer can be changed by selecting different bins. The height of bins and the drawer must be the same. (Please note that the bin that has been attached to a drawer cannot be reinstalled in other drawers.)
Customization to meet users’ needs

- **Available in 2 types of cabinets**
  - TOUCH cabinet: Cabinet with a touch screen monitor
  - POD cabinet: Cabinet without a monitor for connection to a TOUCH cabinet

- **Unlimited number of POD cabinets can be connected to a TOUCH cabinet.**
  All cabinets are controlled with a PC through the network.

- **Modular system allows the customization of drawers and bins:**
  - The number of drawers per cabinet
  - The height of drawers
  - Layout inside the drawers
  - The size of bins in each drawer
